

# GOAL 1

# RESTORE

---

**Summary:** Restore wetlands (aka “estuarine habitats”) so they can help improve water quality, reduce flooding, adapt to climate change, and support fish, birds, and other animals & plants that live there.

**Complete Draft Text:** Restore, enhance and/or create estuarine habitats (intertidal mudflat, salt marsh, tidal channels, & marsh/upland ecotone) to provide ecosystem functions and services, such as water quality improvement, shoreline stabilization, carbon sequestration, resistance and resilience to climate change and associated effects, and fish & wildlife support.

# GOAL 2

# PROTECT

---

**Summary:** Protect the wetlands from negative impacts of human activity.

**Complete Draft Text:** Protect the existing and restored estuarine habitat and associated wildlife from detrimental anthropogenic impacts (direct and indirect) associated with surrounding development.

# GOAL 3

# PROVIDE

---

**Summary:** Provide ways for the community to engage with natural resources through access, recreation, and education.

**Complete Draft Text:** Provide new and/or improve opportunities for public access, education, research, and recreation in ways that improve understanding and stewardship while protecting the existing and restored estuarine habitats and associated wildlife.
